Tel: 0208 969 1145

Grave numbers and plot names explained

For assistance in locating a grave or to look up a grave number please contact the office or a member of the grounds staff.

This page is about grave numbers and plot names of Private Graves for information about Public Graves please see here.

Grave Numbers Explained

Every grave at St Mary's Cemetery has a number; however they are in many different formats.

Some examples:

12 ABC or 34x D

Number and Plot Name

56 R 7 SF

Number, Row Number and Plot Name

8910 or 1112x or 1314 SN

Straight Numbers

What does the x mean?

Some graves have x after the number as they are extra graves added after the plot had been numbered. It is important to distinguish this from the Plot Name; check the list of Plot Names below.

Number and Plot Name

These graves have a number followed by letters. The number is the grave number and the letters are an abbreviation of the plot name. See the list below to find the meaning of the plot name and the map for the location of the plot.

Number, Row Number and Plot Name

The newer plots have Row Numbers to make it easier to locate a grave.

These are in the form: grave number R row number plot initials

For example: 12 R 3 SG

This is grave number 12 in row 3 in St George's Plot.

All the plots with row numbers are named after saints and so the plot initials will start with S. These plots are lawn cemetery sections which means the graves are only allowed a fixed size of headstone (3' high x 2.5' wide) to keep the plot looking uniform and tidy. St George's Plot is the newest of these

plots and starts with Row 5 at the west end of the plot. The grave numbers run south to north so the first grave (1 R 5 SG) is in the south west corner of the plot, bottom left on the map. North of that grave is 2 R 5 SG, and east of that grave is 1 R 6 SG.

St George's Plot has graves available for purchase. For more information about purchasing a grave contact the office.

Straight Numbers

These are shown as just a number or a number followed by x or a number followed by SN.

These graves are in the older section of the cemetery known as Straight Numbers. This is shown on the map as SN. These graves are in many different sections around the cemetery and can be quite tricky to locate.

Numbers 7220 SN - 9085 SN were reclaimed by the cemetery in 1970, covered with 12' of fresh soil which is now used for the graves in St George's Plot (shown on map as SG). The affected SN graves were not disturbed in any way. The cemetery will not reclaiming any other graves from the SN section in the near future.

Plot Names Explained

Every plot at St Mary's Cemetery has a name; the initials of which are shown on the cemetery map.

The list below gives the meaning of the plot names; some are not known.

A A - A Plot

B BS - Bon Secour (between NE & RS)
